

Beecham Gap Transmission Line & Substation Project

Project Overview

Brazos Electric plans to construct approximately 14 miles of new 138-kV transmission line and a new substation northwest of Copperas Cove, Texas. The new Beecham Gap Substation will occupy approximately six acres.

Voltage and Structure Type

Single-circuit strung, double-circuit-capable 138-kV transmission line on steel monopoles.

Project Map

See page 2.

Application

On January 24, 2025 Brazos Electric filed an application with the Public Utility Commission of Texas (PUCT) under Docket No. 57529 to construct and operate the proposed project. Click [here](#) to access the docket on the PUCT Interchange.

PUCT Decision

The Notice of Approval was signed on June 20, 2025. Click [here](#) for a copy.
